

**DIRE PREDICTION FOR COAST FUTURE:  
EVERY YEAR, WE COULD EXPECT ...**

**110 DAYS  
OF 35C**

THE Sunshine Coast faces the frightening prospect of a future in which climate change will push temperatures above 35C for up to 110 days each year.

That was the grim prediction yesterday from a Coast expert as the area joined the climate-action tsunami that has gripped the nation while world leaders meet in Copenhagen.

Associate Professor Peter Waterman from the University of the Sunshine Coast told a rally in Cotton Tree Park that by 2070, a third of the year would be spent in hothouse conditions. **TURN TO PAGE 7**
