Renewable Energy Solutions

Queensland-based solar company Ingenero puts the brightest minds in solar on your roof.

Their team of solar experts have designed some of the country's biggest and most innovative solar energy stations, such as Australia's largest flat panel installation at the University of Queensland in Brisbane and the multi-award-winning solar power station at the Alice Springs Airport.

This same experienced team will design and install solar at your home. Plus, with Ingenero's industry-leading 10-year replacement guarantee on all panels, components and workmanship and their unique online performance monitoring software, EcoWatt, the Ingenero advantage is clear.

Visit Ingenero at the 2011 Rockhampton Home Show and Caravan and Camping Expo to discuss a brilliant solar solution for your home. Look for Ingenero in the James Lawrence Pavilion.
